

Transforming Lives Through Meaningful Impact

Sharp inequalities in access to advanced therapies have denied the benefits of progress in medical science to almost a third of the world's population. Hefty price tags on lifesaving drugs have created unbearable financial burden for patients in most of the world. Inadequate research spending has led to a fragile medical innovation ecosystem with serious repercussions on global preparedness for health emergencies.

COVID-19 served as a wake-up call for the global pharmaceutical sector, forcing the community to rapidly innovate and rethink ways of improving access to essential, lifesaving medicines.

Biosimilars can improve patient access to quality medicines

Biologics represent the cutting-edge of biomedical research, and biosimilars present an enormous opportunity to provide affordable access to these advanced therapies. Biosimilars are intended to increase patients' access to biologics as they are priced lower than branded, novel biologics and may further lead to the competitive pricing of the original biologic.

Biosimilars can ensure a greater and more equitable access to biologic therapies and to healthcare generally. Biosimilars are projected to generate US\$290 billion in savings around the world through 2027, according to IQVIA's Global Use of Medicines Report for 2023.

Biocon Biologics is today one of the frontrunners in the global biosimilars industry, working to provide patients access to affordable biologics and enable health equity worldwide.

Our Biosimilars Journey

2000	2003	2004	2009	2011	2013	2014
Leverages fermentation technology strengths to start insulin development program.	Begins work on antibodies using mammalian cell-based expression systems.	Develops and commercializes Insugen (recombinant human Insulin) in India as world's 1st <i>Pichia pastoris</i> platform based human insulin.	Expands insulins basket with the launch of Basalog® (biosimilar Insulin® Glargine) in India.	Introduces a reusable insulin pen, INSUPen®, marking a foray into devices.	CANMAb®, a biosimilar to Herceptin, is approved in India as the 1st biosimilar Trastuzumab to be authorized anywhere in the world.	CANMAb® is launched in India for the benefit of patients with HER2-positive metastatic breast cancer.
			Partners with U.S.-based Mylan (now Vitris) to co-develop a high-value portfolio of biosimilars for oncology and autoimmune indications.	Starts work on the construction of its state-of-the-art insulin manufacturing and R&D facility in Johor, Malaysia.	Expands Viatrix co-development partnership to include a portfolio insulin analogs.	

Our Biosimilars Journey

2016	2017	2018	2019	2020	2021	2022
<p>FFP-112 (Insulin Gargine), a biosimilar of Lantus, is the first 'Made in India' biosimilar product to be approved and commercialized in Japan.</p>	<p>Ogivri®, a biosimilar to Herceptin, becomes the first biosimilar Trastuzumab product to be approved in U.S.</p>	<p>Fulphila®, a biosimilar to Neulasta, becomes the first biosimilar version of Pegfilgrastim to be approved in U.S.</p>	<p>Biocon consolidates its Biosimilars business under an independent entity, Biocon Biologics, with its own dedicated management.</p>	<p>Semglee® receives approval and is commercialized for the benefit of diabetes patients in U.S.</p>	<p>Biocon Biologics signs a strategic alliance with Serum Institute Life Sciences, marking its entry into vaccines.</p>	<p>Biocon Biologics announces a landmark acquisition of the global biosimilars business of its long-term partner Viartis for USD 3.335 billion in cash and stock.</p>
	<p>Expands cancer portfolio with the launch of KRABEVA® (biosimilar Bevacizumab) in India.</p>	<p>Semglee® (Insulin Gargine), a biosimilar to Lantus, receives regulatory approval and is commercialized in EU</p>	<p>Ogivri®, our biosimilar Trastuzumab, is commercialized in U.S., Canada, Australia, several EU countries.</p>	<p>Fulphila®, our biosimilar Pegfilgrastim, is commercialized in Australia, Canada.</p>	<p>Semglee® receives a historic U.S. approval as the world's first 'interchangeable' biosimilar and is commercialized in U.S.</p>	<p>Abevmy®, our biosimilar Bevacizumab, is commercialized in Canada.</p>
		<p>Partners Sandoz to co-develop next-generation biosimilars</p>	<p>Semglee® becomes the 1st biosimilar Insulin Gargine to become available on Australia's Pharmaceutical Benefits Scheme.</p>	<p>Biocon Biologics receives investments from True North, Tata Capital Growth, Goldman Sachs.</p>	<p>Biocon Biologics receives investments from Abu Dhabi-based ADQ.</p>	

Driven by a Purpose to Address Unmet Needs for Affordable Biologics

Biocon Biologics is driven by a strong sense of purpose and the unwavering commitment to serve patients and healthcare systems across the globe by unlocking equitable access to high quality biosimilars.

Healthcare systems across the world are skewed towards serving the affluent, denying access to many. Biocon Biologics is challenging the status quo by putting 'patients first' to make a long-term social impact worldwide.

We are leveraging our affordable innovation model to reduce disparities in access to safe, high-quality medicines, as well as improve patient outcomes and provide global communities with differentiated, high-quality and affordable healthcare solutions.

Our business model seeks to make biologic therapies affordable, accessible and available to all, thereby benefiting patients and their families across the world.

Our roadmap for the future is to enable a healthier world.

TRANSFORMING HEALTHCARE. TRANSFORMING LIVES.

Poised to Make a Meaningful Difference

Biocon Biologics' relentless strategic intent to stand out and stand apart has steered us into new growth paths, which include the landmark acquisition of the global biosimilars business of our long-term partner Viatrix for over USD 3 billion in cash and stock. It is one of the biggest M&A deals in the Indian pharma space, and a historic inflection point in Biocon Biologics' value creation journey.

This acquisition is a game changing event that catapults Biocon Biologics into the big league – a unique, fully integrated leading global biosimilars company.

By combining the complementary capabilities and strengths of two long-term partners, we are leveraging THE POWER OF ONE to reduce healthcare inequities and transform healthcare, worldwide.

A Partner of Choice

Biocon Biologics has a proven track record of scientific capabilities, large scale manufacturing capacities and a strong supply & distribution network in compliance with the highest standards of quality and governance. We hold ourselves to the highest standards of ethics and compliance in our relentless pursuit to make a real difference. We are lowering treatment costs and improving healthcare outcomes whilst delivering shareholder value and on the business objectives.

Passion to Impact Global Health

Our passion to impact global healthcare has led us to build a diverse portfolio of products straddling monoclonal antibodies and other conjugated recombinant proteins for cancer and autoimmune diseases, as well as human insulin and insulin analogs for diabetes.

We are leveraging our advanced science, global scale and our long experience in biopharmaceuticals to develop and manufacture high-quality biosimilars for a global patient population.

Protecting the Health of our Planet

While pursuing our purpose of using biotechnology to develop therapies that heal the world, Biocon Biologics is equally concerned about the health of our planet and the deteriorating ecological balance.

As a responsible corporate citizen, we have designed our operations to enable environmental sustainability with a low carbon footprint while ensuring maximum recycling of wastewater and the use of green power.

Supporting environmental and health equity is our commitment to diversity and inclusion at the workplace. We have consistently endeavored to create a collaborative and empowering work culture, when building businesses that make a meaningful social impact.

We have established globally benchmarked standards of governance to build an environment of trust, transparency and accountability necessary for fostering long-term investment, financial stability and business integrity, thereby supporting a stronger growth and more inclusive societies.
